**Statement on principal adverse impacts of investment decisions on sustainability factors**

<b>Financial market participant – KEREN FINANCE</b>
<p><b>Summary</b></p> <p>KEREN FINANCE - considers principal adverse impacts of its investment decisions on sustainability factors. The present statement is the consolidated statement on principal adverse impacts on sustainability factors of KEREN</p> <p>This statement on principal adverse impacts on sustainability factors covers the reference period from 1 January to 31 December 2023.</p>
<p>Description of the principal adverse impacts on sustainability factors</p> <p>PAIs (Principal Adverse Impacts) are key indicators used to measure the most significant negative impacts of investments on the environment, society and governance (ESG). They were developed by the European Union as part of its regulations on the transparency of sustainable investments. The PAI framework is based on a "double materiality" approach, which means that it takes into account both the financial and non-financial impacts of investments. This enables investors to better understand the risks and opportunities associated with sustainable and responsible investment.</p>
